

Ergonomic benefits of the Ovation® Pipette

Proven to significantly prevent and reduce injuries.

*Carpal Tunnel * Tendinitis * RSD * MSD * Tennis Elbow * Muscle Fatigue*

- Independent Studies -

"The re-designed, low force pipette showed a significant reduction in the most important MSD risk factors for pipetting, as compared to other traditional axial-design pipettes."

"Overwhelming preference for Ovation in terms of comfort."

Pipetting is the #1 Cause of MSD's (Musculoskeletal Disorders) in laboratory workers. US employers are currently paying in excess of \$15 Billion per year in worker's comp due to MSD's.
—OSHA

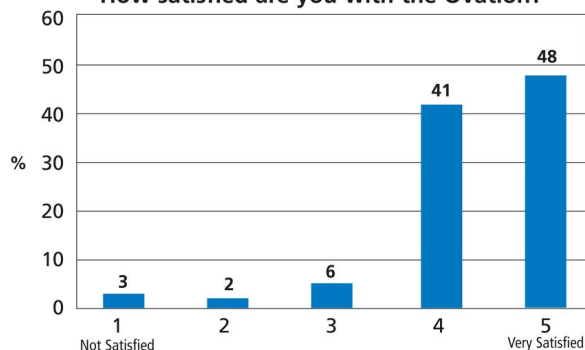

\$1.00 invested in ergonomic prevention = **RETURN \$17.80** – JAMA

Why the Ovation works?

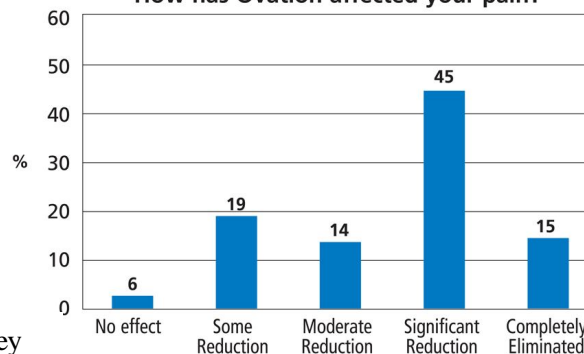

Unlike traditional pipettes, the Ovation is designed for the way your body works. The Ovation drops your elbow and puts your arm and wrist in a "stress-free" position close to the work surface.
